PROFESSIONAL EXPERIENCE

UI/UX Developer & Quality Assurance (QA) Engineer — nopCommerce February 2026 – Present | Karachi, Pakistan

- Develop and maintain responsive, user-friendly web interfaces across modern browser environments.
- Perform manual testing of application functionality, user workflows, and overall UI/UX integrity.
- Identify, document, and report complex functional, design, and usability bugs.
- Verify bug fixes through systematic regression and retesting workflows to ensure high software quality.
- Collaborate closely with development teams to resolve performance bottlenecks and optimize end-user experience.

PHP Developer — Anomoz Softwares November 2025 – December 2025 | Karachi, Pakistan

- Developed and maintained scalable PHP/MySQL-based web applications.
- Built responsive frontend interfaces leveraging HTML, CSS, JavaScript, and Bootstrap.
- Implemented robust backend functionality and resolved critical operational bugs to deliver reliable software.

KEY PROJECTS

Vaccino – Vaccination Management System 2025

- Built a full-stack web application for managing hospital vaccine inventory, appointments, and patient records.
- Developed an administrative dashboard integrated dynamically with MySQL database logic.
- Implemented secure user authentication, role-based access control (RBAC), stock tracking, and appointment scheduling.

Task Manager – Laravel Project 2025

- Developed a task management web application using Laravel and MySQL for robust database handling.
- Implemented full CRUD operations, authentication systems, and user role management.

Scriptory – Blog Platform 2024

- Developed a responsive blog platform with category filtering, author profiles, and reusable frontend components.
